

GRAPHIC DESIGN

This can be the difference between your business image blending in with the rest or standing out from the crowd. It is an investment in your business' future, and can go a long way to giving your clients the right message about you.

With the aid of our experienced graphic designer, not to mention our state of the art PCs and all the up to date software, we can design your logo, business cards, letterheads, folders, brochures, leaflets and much more, with a refreshing and modern approach. After all, you only get one chance to make a first impression. So let's make it a good one.

Our artwork/design packages are very competitively priced, and provide our customers with value for money, no matter the job. Some of our design services are detailed below. These can be quite flexible depending on the size of the job.

Design Process - We like to provide our customers with a finished product that looks and feels original, and we can do this by offering our customers bespoke designs, rather than always using standard templates.

The process includes:

- Professional design service including laying out print ready artwork
- Providing a printed proof/PDF proof emailed/downloaded using a suitable download link.
- Up to three rounds of changes/minor alterations
- Spelling and grammar check if desired.

Customers are asked to provide:

- All copywriting supplied digitally or written (priced accordingly)
- Company logo(s) if not part of the design process, including any qualification logos
- Any specific images you would like to be included in the design process

How to Order:

- Simply get in contact either by telephone, email or Facebook and provide all the necessary information so we can provide you with a quote for the design work. We are happy to take the time to talk to you in more depth about the design process if there is anything you are not sure about. If you are looking for us to print the completed design as well, we can provide a quote for this at the same time.
